WELCOME TO THE WORLD OF RVM HOLDING, KILN BUILDERS SINCE 1974

We greatly appreciate you making the effort to read our company documentation. Our firm specializes in designing, making and installing process plants for the ceramic industry. Ceramic products give a luxurious effect, and it is impossible to imagine our daily environment without them. These high-quality products require little maintenance and have a long life in comparison with steel and wood. Our firm contributes substantially to the realization of these high-quality products.

OUR ORGANIZATION

RVM Holding is a transparent organization featuring short communication lines. We put the client at the centre in design and development. Using our many years of know-how and experience to your advantage, we support and advise you in order to achieve an optimum result together. We are expert, reliable and flexible in this field. We employ the right people expertly suited for the job so that we are capable of handling your commission rapidly and accurately.

TAILOR-MADE

Do you have specific wishes requiring guts and tailor-made or innovative solutions, you have come to the right firm. We draw and design, advise and make your ideas come true. We do not say no, but make it! Often leading to surprising results, which were thought impossible. Do not hesitate to contact us and inform yourself in person of the possibilities we can offer you in the fascinating world of the ceramic industry.

MARKET & SERVICE

We are active on the international market and we have already delivered a lot of intermittent kilns throughout Europe. Besides delivering process plants, we also take care of the service and scheduled maintenance, if so desired. Local regulations are part of the progress of the production process on site.

PRODUCTS DESIGNED, MADE AND ASSEMBLED BY US

- Intermittent kilns, such as:
- Car kilns
- Top-hat kilns
- Chamber kilns
- Burner arrangements
- Control techniques
- Gas units
- Customized designs and solutions

EXPERTISE & QUALITY

Our know-how and experience are secured in our quality system and guarantee products that satisfy your and our requirements. Over thirty-seven years of experience combined with a thorough technical know-how of the ceramic processes and the materials processed by us, ensure a reliable, perfect and durable product.

FROM COMPONENT TO COMPLETE ASSEMBLY

From partial delivery to complete process plants; measuring up, drawing, making and installing. Coordination and inspection, we take our responsibility, sound and reliable. Quality at an excellent price/quality ratio. In addition, we aim at providing all our clients with an optimum energy/performance balance per unit of production. Controllability of the production process and dependability, as well as our expertise and flexibility, are our motives for what we do, now and in the future. Your interest is our interest, and constitutes our continuity.

OUR PRODUCTS ARE USED IN

- Ceramic industry
- Glass manufacturing industry
- Blue bricks
- Roofing tiles
- Other ceramic products
- Glazed stoneware pipes
- Technical ceramics
- Delivery throughout Europe
